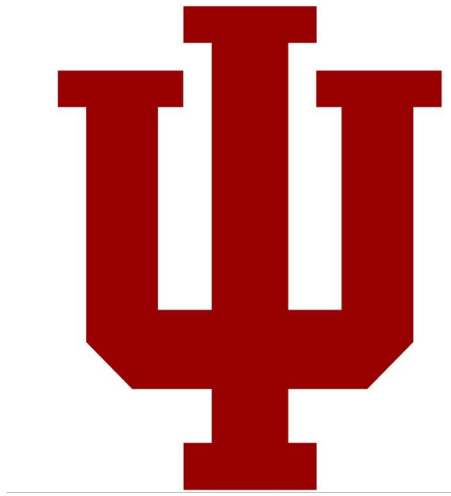
Hardware Security Papers

Engr 399/599: Hardware Security

Andrew Lukefahr
Indiana University



Adapted from: Mark Tehranipoor of University of Florida

Course Website

engr599.github.io

- Write that down!

Exam

- 83% Average (Pre-curve)
- Curve
  - +10% for Undergraduate
  - +5% for Graduate

The difference between asymmetric and symmetric crypto?

What is a cryto processor and why do we rely on them?

What is a Physical Unclonable Functions (PUF)? Describe two issues associated with PUFs

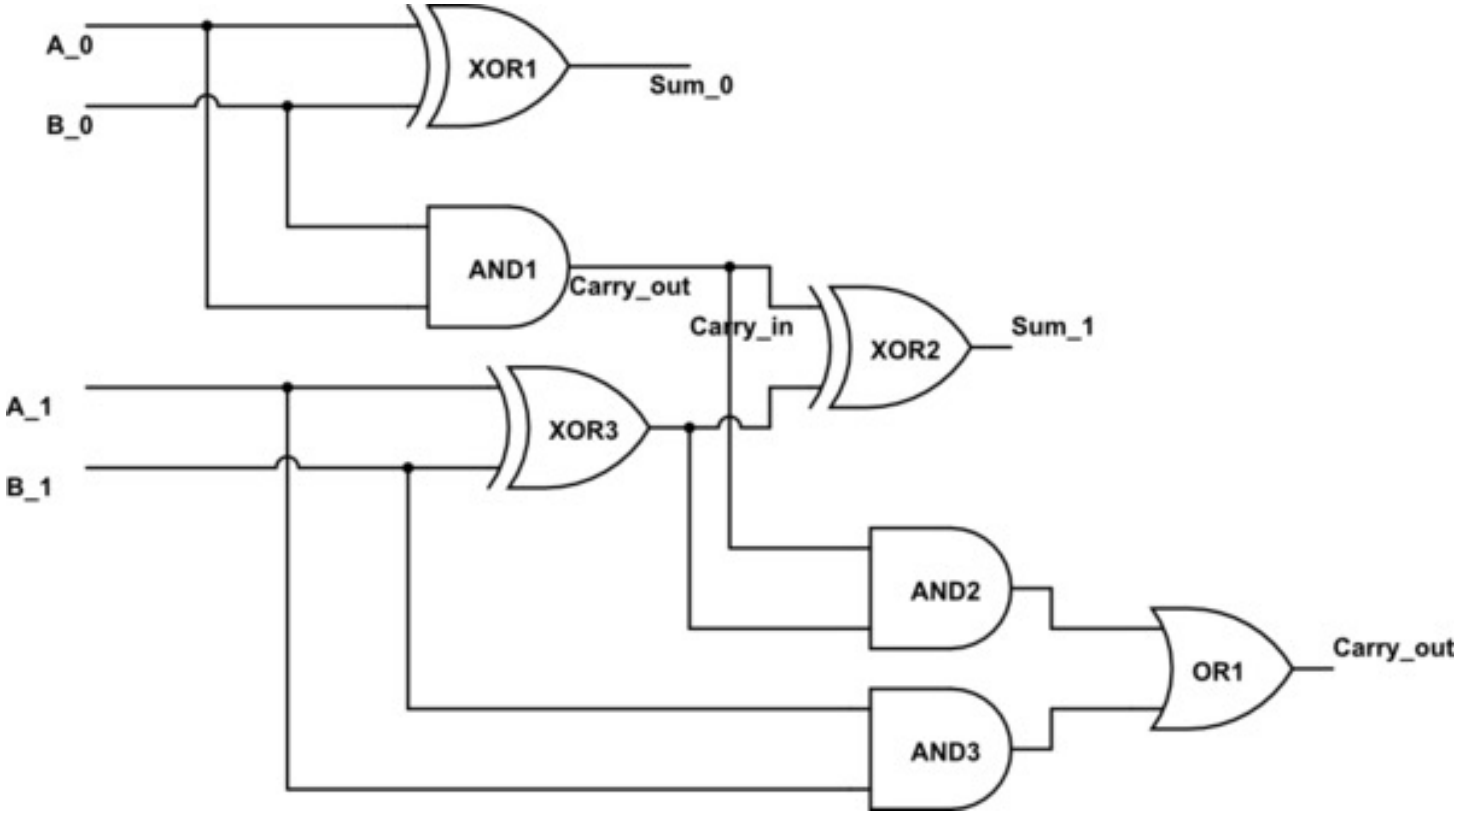
Describe a method for calculating a true random number?

Difference between non-invasive, semi-invasive, and invasive physical attacks. Give an example of each

Explain how one can detect a hardware Trojan using transient power analysis?

Explain how Differential Power Analysis can be used to recover secret information?

In the following design, insert a Trojan that is difficult to detect



Paper Presentations

Each Group gets to present 2 papers

- We'll pick them in a little while.
- From suggested list, exceptions possible

Non-presenting individuals:

- Read the paper before class
- Submit short write up to canvas
- Come to discuss

Canvas Writeup (1 sentence/ question)

- What's the problem?
- Why is it important?
- What did this paper do about it?

Presenting Group

- 45 minute presentation (!!!)
- Shared between the 3 of you

Suggested Presentation Slides

- Title – 1 slide
- Big Picture – 1 slide
- Overview – 1 slide
- Intro – 7 slides
- Overview – 1 slide
- Meat – 20 slides
- Overview – 1 slide
- Results/Graphs – 5 slides
- Overview – 1 slide
- Conclusions – 3 slides

Title – 1 slide

- Paper title
- Paper authors

- Presentation authors

Big Picture – 1 slide

- What's the problem?
- Why does it matter?
- What are the author's going to do about it?

Overview – 1 slide

- Introduction
- Meat
- Results
- Conclusions

Introduction – 7 slides

- How did we get here?
- Why is this problem important to solve?
- What background do I need to know?

Overview – 1 slide

- Introduction
- Meat
- Results
- Conclusions

Meat – 20 slides

- What does the system work?
- Figures / Diagrams are helpful here.
- Sub-sections are also useful.

Overview – 1 slide

- Introduction
- Meat
- Results
- Conclusions

Results / Graphs - 5 slides

- Does it work?

Overview – 1 slide

- Introduction
- Meat
- Results
- Conclusions

Conclusion – 1 slide

- What did I learn?
- What do you (presenter) think of paper?
- What do you (presenter) think we should do next?
